

# We understand Construction, Engineering & Renewable Energy Insurance.

An overview of our appetite.

## Trading regionally

Regional Intact Insurance offices house expert underwriters with the skills and authority to meet your and your clients' construction and engineering needs.

### Construction

We provide comprehensive insurance solutions for many types of construction contracts including new builds and the alteration, repair or refurbishment of existing property.

We actively target the following risks:

#### Single Period Contractors Insurance

All risk insurance for one-off, single period projects. These can be arranged as Contractor (CCIP) or Employer (OCIP) led programmes and depending on contract requirements, may be extended to include:

- Existing structures
- Own & hired-in contractors, plant
- Public liability
- Advance loss of profits
- JCT 6.5.1 insurance

#### JCT 6.5.1 Insurance (formerly JCT 21.2.1)

A non-negligent liability cover often required under a Joint Contract Tribunal building contract. Available as a standalone product or alongside the contract works cover.

#### Contractors Annual Insurance

Contractors all risks and associated liability cover for builders, electricians, and civil engineers.

## Engineering

Our engineering covers assure peace of mind by targeting specific risks, offering straightforward, comprehensive, and flexible protection for clients' livelihoods in case of loss. We actively target the following risks:

### Erection All Risks

All risks cover for the assembly, installation, testing and commissioning of machinery and plant at contract sites. Available as a one-off, single period project or as an annual placement.

### Contractors Plant

Cover for customers own and hired in contractors plant and equipment. Innovative 'Inventory Plus' cover option available.

### Machinery Movement

Cover for loss or damage to machinery, plant and equipment during defined operations. Suitable for plant hauliers, machinery movers and specialist installation contractors.

### Machinery Breakdown & Engineering Business Interruption

Cover for breakdown, pressure explosion or unforeseen damage tailored to your clients needs. Our cover could help to restore business operations post machinery breakdown, minimising downtime and speeding up operational continuity.

### Computer & Electronic Equipment Insurance

All risks cover for a wide range of both static and portable equipment.

## Renewable energy

Building on our experience in construction and engineering, Intact Insurance have developed strong expertise in the renewable energy sector. Our renewable energy products provide insurance solutions for both the construction phase and the operational requirements of the following asset types:

### Wind Energy

Onshore wind installations meeting Intact Insurance risk control standards.

### Solar Energy

Ground mounted solar installations meeting Intact Insurance risk control standards. Roof mounted assets on non-combustible buildings.

### Short Term Operating Reserve (STOR)

Utility scale commercial installations meeting Intact Insurance risk control standards.

### Hydro Energy

Run of the river & Archimedes screw hydro schemes meeting Intact Insurance risk control standards.

### Battery Energy Storage Systems (BESS)

Utility scale commercial installations meeting Intact Insurance risk control standards.

### Bio Energy

Biogas risks meeting Intact Insurance risk control standards. Biomass heating systems, subject to Intact Insurance risk control standards.
