

CARGO eSOLUTIONS DELIVERED VIA RSA ONLINE

Specifically designed to meet the needs of UK-based SME businesses that import and/or export goods and materials Worldwide. Cargo eSolutions provides annual cover, keeping your clients' businesses moving should their cargo be damaged or lost while in transit.

DID YOU KNOW...

Cargo eSolutions is the first marine cargo product that is written in plain English, offering cover on an 'All Risks' basis without reference to Institute Cargo Clauses.

OUR KEY SELLING POINTS

The provision of cover on an "All Risks" basis reduces any anomalies that may occur due to application of the Institute Cargo Clauses.

Being solely available online, it is quick and easy to obtain quotes and issue documentation in your office. From initial login to the production of a policy schedule can take as little as 3 minutes to complete.

Mid-term adjustments and renewals are all handled online too, saving you time and enabling speedy response to your clients' needs.

The online system is supported by a dedicated team of underwriters who will handle any queries or business that does not fit the online proposition. This ensures that RSA Marine can meet all your clients' needs.

FLEXIBLE COVER

For businesses that only require cover for occasional or one-off shipments, we have an online option that meets these needs too.

Issued on our innovative All Risks Marine Cargo policy wording, the flexible online option provides a quick and cost effective way of covering movements that are so infrequent that an annual cover is not suitable.
